WORK EXPERIENCE

9Now - Nine Entertainment

(Jan 2022 - Present)

Associate Engineer

- Delivered an initiative to re-design CI/CD pipeline & architecture to enable infrastructure-as-code and vastly improve developer experience. Implemented via Terraform
- Improved CI build speeds by 40% (5min -> 3min) on average due to leveraging Docker BuildX, i.e. using remote caching. Also enabled the use of versioned deployments through Docker tags and Slack integration
- Improved 9Now Web's home page Lighthouse scores by 20 points by implementing virtual lazy-loaded rail elements
- Strong driver of transition to TS from JS for team's repositories
- Was responsible for transition of Node version from 6.x to LTS 16 for large legacy React application
